THE NEW STANDARD IN DESIGNER RAILINGS

THE ULTIMATE IN RAILING SYSTEMS: INGENIOUS DESIGN, IMPECCABLE QUALITY, UNCOMPROMISING SAFETY Q-railing is an innovator in the field of railing systems. We provide complete solutions that are instantly recognisable for their quality, unique design and unparalleled performance. Around the world, our professionals share a passion for innovation and a commitment to design excellence.

A well-designed railing system can enhance and complete an architectural plan like nothing else. Imagine having unlimited creative freedom over the choice of components and materials in your railing system. Select and combine different elements so that the final result blends seamlessly with the surrounding architecture. Or take the opposite view and construct an eye-catching feature railing. Anything is possible with our extensive range of fully modular components. Many product lines can be combined with items from other systems to create a completely new appearance. Each component is superbly engineered and finished – designed to save time and expense during installation.

THE PREMIUM BRAND IN RAILING SYSTEMS

Q-RAILING'S REPUTATION FOR DESIGN EXCELLENCE IS GOING GLOBAL. OUR LIST OF SUCCESSFUL PROJECTS IS EXTENSIVE. Ranging from private houses to office buildings, from concert halls to major sports arenas, each installation makes a unique optical and functional statement, thanks to the renowned flexibility and quality of our products.

Glass railing systems

Whether your project is a private residence or a sports stadium – or something in between – our systems let you create stunning glass railings that can be installed with ease. A vast range of beautifully engineered components is available for indoor and outdoor settings. And with flexibility designed into each cap rail, railing base, and other glass railing product, we can provide an elegant solution to just about any architectural challenge.

Baluster railing systems

Enhance a stairway, balcony or atrium by installing a baluster railing system from Q-railing. We have round, square or rectangular forms as well as infills that use cables, bars, web or glass. Create a look that really expresses your vision.

Handrail systems

A great looking handrail can be the detail that transforms a space. Of course, the choice of materials is all important. At Q-railing, you will find a wide range of handrails in stainless steel and various types of wood. And no matter what effect you desire, or what type of application you are working with, Q-railing has a bracket to suit.

GLASS RAILING SYSTEMS

EASY GLASS[®] HYBRID THE BEST OF TWO WORLDS

HYBRID FEATURES

The strength of Easy Glass[®] Hybrid comes from its precise design and combination of its durable cap rails and slimline base shoe, just 43 mm high, both made of high-grade aluminium. The system can be reinforced with super-strong yet elegant 12 mm wide posts.

PROJECTS

Easy Glass Hybrid is an ideal solution for projects that require a value-engineered glass balustrade, but with discreet structural support. Balconies and roof terraces are easily transformed into design features with a sophisticated modern appearance.

VALUE-ENGINEERED SYSTEM

EASY GLASS HYBRID IS Q-RAILING'S LIGHTEST GLASS RAILING SYSTEM. IT IS DESIGNED FOR EASE OF INSTALLATION AND LOW MAINTENANCE.

The Easy Glass Hybrid system offers a great deal of flexibility for different span widths. Mounted between two walls, and using the larger of the two cap rails, you can create a completely baluster-free railing spanning up to 3 metres, depending on country-specific regulations. Should your project call for a longer balustrade, simply add the slender baluster posts. The precise number of posts will be determined by the particular situation and your design preference.

The steel posts are available in four different sizes - two for top mounting and two for fascia mounting. Their silver-grey powder coating suits the aluminium of the base shoe and cap rails. The aluminium components come with either a matt silver effect or in raw finish. All variants are slim and elegant, contributing to a stylish look that affords maximum transparency.

EASY GLASS HYBRID **SPECS**

- Lightweight aluminium base shoe
- Mountable with or without posts
- No anchors required for the installation plugs and screws only
- LED lighting options available for cap rails (with Q-lights Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top and fascia mount
Applications:	Balustrades
Material:	Aluminium and powder-coated steel
Infills:	Glass
Glass thickness:	8 to 13.52 mm
Top finish:	Cap rails available in various gauges

EASY GLASS® SLIM SLIM DESIGN, BIG IMPACT

EASY GLASS® SLIM COMBINES MINIMALIST FEATURES, OPTIMAL TRANSPARENCY AND AFFORDABILITY IN ONE RAILING SYSTEM.

SLENDER AND SAFE

At only 45 mm wide, the Easy Glass Slim base shoe is one of the slimmest in the industry. Nevertheless, the system fully complies with international testing and safety standards. Its elegant profile makes it a perfect fit for any contemporary construction.

PROJECTS

Easy Glass Slim is a comprehensive and affordable solution that adds refinement to both interior and exterior settings. With its thin yet strong base shoe it is ideal for railings situated on landings, balconies and stairs in private residences, commercial buildings, shops and many other locations.

CLEAN LINES

WANT TO BRING A DRAMATIC 'WOW' FACTOR TO A RESIDENTIAL OR LIGHT COMMERCIAL BUILDING? TAKE A LOOK AT EASY GLASS SLIM.

The clean lines of the Easy Glass Slim system make for an ultra-modern appearance and optimal transparency – all at a very attractive price. There are aluminium base shoes for both top and fascia mounting that are light and easy to position. With an outstanding stainless steel effect finish, they can be used without cladding. As you would expect, the range includes excellent corner solutions, end fittings, and cap rails, which help to create a totally seamless result. You can even add a cap rail or handrail with linear LED lighting for extra safety and visual impact.

The glass infill can be installed quickly and securely thanks to the Safe Wedge system. Installation is completed by gluing and clamping – no welding is necessary.

Needless to say, Easy Glass Slim has been thoroughly tested. Approvals and performances certificates have been gained from regulating authorities in more than ten countries.

EASY GLASS SLIM **SPECS**

- Slim design
- Lightweight easy-to-manoeuvre base shoe
- Cladding available (stainless steel or aluminium with stainless steel effect)
- LED lighting options available for cap rails (with Q-lights Linear Light) and glass-mounted handrails (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top, in-floor and fascia mount
Applications:	Stairs and balustrades
Material:	Aluminium, raw or with a stainless
	steel effect
Infills:	Glass
Glass thickness:	12 to 21.52 mm
Top finish:	Cap rails, glass-mounted handrails,
	U-profiles and Edge Protection in a
	variety of shapes, materials and sizes

EASY GLASS® PRO GLASS ALIGNMENT MADE EASY

THE ONLY BASE SHOE THAT LETS YOU FINE-TUNE THE POSITIONING OF GLASS PANELS FROM INSIDE THE BALUSTRADE.

NO SCAFFOLDING

With Easy Glass[®] Pro all adjustments are carried out from the inside of the balustrade. That means no scaffolding is required. It makes the system highly suitable for balustrades at high levels and environments that cannot accommodate scaffolding.

PROJECTS

Easy Glass Pro lets you create stair railings and balustrades that contribute to a bright and open ambience. It is suitable for indoor and outdoor use in light and medium use environments, such as private homes, commercial buildings and retail shops.

GOING PRO

THE EASY GLASS PRO RANGE NOT ONLY INCLUDES REGULAR TOP AND FASCIA MOUNT BASE SHOES, BUT ALSO TWO SPECIAL BASE SHOES FOR NON-FINISHED FLOORS AND AN "INVERSE" MODEL.

The range's F-shaped base shoe is for top mounting directly onto or even over the edge of a balcony. The Y-shaped base shoe lets you fascia mount a balustrade onto concrete slabs, so that the sides of screed floors are hidden. Last but not least, the "Inverse" is for fascia mounting on the inside of parapet walls around balconies. All of the possible base shoe installations have been extensively tested, earning certificates or approval from highly respected regulating authorities worldwide.

The Easy Glass Pro base shoe works with the Safety Wedge system for simple mounting of the glass panels. It comes with either fixed or adjustable wedges, the latter letting you adjust each glass panel independently by up to 1 cm from the vertical for perfect alignment of the glass.

If you are planning a top mounted Easy Glass Pro railing, you can opt for a base shoe cladding that incorporates Q-lights Linear Light. Its LED lighting will add safety and ambience to your design. Various effects are available, including warm white, cold white and RGB-coloured light.

EASY GLASS PRO SPECS

All mounting and adjusting takes place inside the balustrade

EASY GLASS® MAX THE STRONGEST BASE SHOE EVER

IT MAY SEEM A BOLD STATEMENT, BUT EASY GLASS® MAX TRULY IS THE STRONGMAN IN THE Q-RAILING RANGE.

ROBUST MINIMALISM

Designed for heavy to extremely heavy use, both indoors and outdoors, Easy Glass Max delivers maximum strength with minimum weight. Robust as it is, the glass railing system has a light and minimalistic look making for unobstructed views.

PROJECTS

Easy Glass Max is very much the Q-railing "heavy hitter". That makes it the ultimate system for locations with high wind speeds and for buildings that receive intensive use such as sport stadiums and airports.

NO LIMITS

THERE SEEM TO BE NO LIMITS WHEN IT COMES TO EASY GLASS MAX. THE SYSTEM COPES EASILY WITH EXTREME LOADS AND HIGH WIND SPEEDS.

This glass railing system makes a stunning addition to any public area, creating a sense of space and light wherever it is installed. And with a choice of four different base shoe types, all ultra-strong yet lightweight, Easy Glass Max can go just about anywhere.

In addition to standard base shoes for regular top and fascia mounting situations, the Easy Glass Max range includes special F and Y-shaped base shoes. The F is for top mounting directly onto or even over the edge of a balcony floor. And the Y lets you fascia mount a glass balustrade onto the edge of a concrete slab, exactly at your finished floor height, hiding the edges of a screed floor.

Naturally, the system complies with safety and building regulations worldwide.

EASY GLASS MAX SPECS

- Suitable for use in high-demand public areas
- Installs easily no welding required
- A choice of four different base shoes

EASY GLASS® BASE GLASS CLAMPS MAKE A DESIGN STATEMENT

A DISTINCTIVE BASE IS A GREAT WAY TO SET YOUR PROJECT APART, AND NOTHING QUITE COMPARES TO Q-RAILING'S BASE GLASS CLAMPS.

STRIKINGLY DIFFERENT

There are times when you need to make a big statement. For some of your projects, choosing a base with a distinctive and unconventional shape will be exactly the right thing to do. The base glass clamps in the Easy Glass[®] range guarantee a unique and eye-catching look.

PROJECTS

26

Easy Glass[®] base glass clamps are intended for light and medium use in applications such as pedestrian control, poolside barriers and wind breaks. They are designed to be maintenance free, and the highly distinctive surface-mounted elements deliver proven strength. Suitable locations include private residences and light commercial properties.

SLEEK LOOKS

FOR Q-RAILING IT IS KEY: THE COMPONENTS SUPPORTING A GLASS PANEL SHOULD NOT ONLY PROVIDE SAFETY AND SECURITY, BUT SHOULD ALSO CONTRIBUTE TO YOUR DESIRED LOOK.

The Easy Glass base glass clamps will help you realise your design vision, no matter whether that calls for a rounded or angular solution.

The Easy Glass® MOD 61 is sleek and smooth, while the Easy Glass® MOD 62 is characterised by sharp lines and square forms. For the perfect finishing touch, be sure to use the corresponding base cover caps.

The Easy Glass® MOD 6000 base glass clamp and its more robust cousin, the Easy Glass® MOD 6400, have a flawless appearance. No screws are visible on their surfaces. Combine them with your choice of Q-railing cap rail, handrail or Edge Protection profiles for an end result that is in perfect harmony. Installing MOD 6000 and MOD 6400 could not be easier. The glass infill is clamped, so there is no need for holes.

EASY GLASS BASE GLASS CLAMP **SPECS**

- No visible screws to distract the eye
- MOD 6000 comes with a built-in spirit level for easy levelling
- Matching base cover caps available for MOD 61 and MOD 62
- LED lighting options available for cap rails (with Q-lights Linear Light) and glass-mounted handrails (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top mount
Applications:	Balustrades
Material:	316-grade stainless steel
Infills:	Glass
Glass thickness:	12 to 21.52 mm
Top finish:	Cap rails, glass-mounted handrails,
	U-profiles and Edge Protection in a
	variety of shapes, materials and sizes

EASY GLASS® BLOCK GLASS ADAPTERS

SOPHISTICATION AND FUNCTIONALITY

WITH Q-RAILING'S SEAMLESS DESIGN BLOCK GLASS ADAPTERS, GLASS PANELS APPEAR TO FLOAT.

MAINTAINING BALANCE

Aesthetically, Q-railing's Easy Glass[®] block glass adapters have a lot to contribute. They can help you achieve that fine balance between stainless steel details and the transparency of a glass railing. There is much more to these products than good looks.

30

PROJECTS

You can use the Easy Glass block glass adapters for a wide variety of projects. With many different shapes and sizes available, you will definitely find a great design for your type of architectural structure, whether it is a residential build, retail shop or office building.

SEAMLESS DESIGN

WITH BLOCK GLASS ADAPTERS YOU CAN PLAN A STRUCTURAL GLASS RAILING WITH GLASS PANELS EXTENDING OVER A FASCIA.

Easy Glass® MOD 0760-0766 block glass adapters have an attractive oval shape, and come in three different sizes. All have a built-in spirit level for easy levelling.

Easy Glass® MOD 4762 shares many traits with the Easy Glass MOD 0760-0766. That means high quality, great aesthetics and ingenious features including a built-in spirit level. The only difference is shape; while models 0760-0766 are oval-shaped, MOD 4762 has a crisp rectangular silhouette.

The Easy Glass® MOD 0763 is also rectangular in form. But there is a remarkable difference when it comes to functionality. Thanks to a moveable glass pin, the Easy Glass MOD 0763 is just as much a block glass adapter as it is a base glass clamp. Have it installed in pairs at the bottom of a glass panel - one on the left and the other on the right - like any other adapter, or position it between two panels, clamping both.

EASY GLASS BLOCK GLASS ADAPTER **SPECS**

- Single anchor mounted
- Finished with round or rectangular stainless steel cover caps
- MOD 0763 is usable as both a base glass clamp and a block glass adapter
- LED lighting options available for cap rails (with Q-lights Linear Light) and glass-mounted handrails (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Fascia mount
Applications:	Stairs and balustrades
Material:	304 or 316-grade stainless steel
Infills:	Glass
Glass thickness:	8 to 25.52 mm
Top finish:	Cap rails, glass-mounted handrails,
	U-profiles and Edge Protection in a
	variety of shapes, materials and sizes

EASY GLASS® POINT GLASS ADAPTERS A CLEAR PERSPECTIVE

BRING YOUR DESIGN VISION TO LIFE. HIGH-TRANSPARENCY MINIMALISM, AND TIMELESS AESTHETICS COME TOGETHER IN THIS RANGE OF ADAPTERS.

LESS IS MORE

What better way to compose a minimalistic railing than using clear glass with only the merest hint of structural hardware? With numerous options available, you can play with the theme of light and translucence in your designs.

PROJECTS

The Easy Glass[®] point glass adapters are versatile items that can be deployed in many settings, including private residences, offices and restaurants. With a choice of round and square shapes, there is bound to be a glass adapter that serves your vision.

50

FLEXIBILITY AND VARIETY

THIS GLASS ADAPTER RANGE IS ALL ABOUT FLEXIBILITY. YOU CAN USE THE ITEMS WITH A CHOICE OF CLEARANCE BETWEEN WALLS AND GLASS.

The point glass adapters come with a variety of bases that are designed to work with either a mechanical anchor for concrete walls or a bolt that connects to a metal stringer. Most of the adapters have a rounded appearance, for installations that require a softer, more classic look. However, the Easy Glass® MOD 4747 is angular - great for creating a slick, contemporary feel.

With multiple sizes available, you can be confident of finding the perfect match for your railing project.

The round Easy Glass® MOD 0749 adapter has a further advantage – a two-way fixing that allows easy straightening of the glass panels, both during and after the installation. An important feature, given that walls and floors are never perfectly even, and a big help saving time and money.

EASY GLASS POINT GLASS ADAPTER **SPECS**

- Available in various sizes
- No visible screws to distract the eye
- MOD 0749 has a two-way fixing for straightening glass panels during and after installation
- LED lighting options available for cap rails (with Q-lights Linear Light) and glass-mounted handrails (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Fascia mount
Applications:	Stairs and balustrades
Material:	304 or 316-grade stainless steel
Infills:	Glass
Glass thickness:	8 to 25.52 mm
Top finish:	Cap rails, glass-mounted handrails,
	U-profiles and Edge Protection in a
	variety of shapes, materials and sizes

EASY GLASS® JULIET BALCONIES TRANSFORM YOUR FAÇADE
JULIET BALCONIES CAN ENHANCE THE APPEARANCE OF JUST ABOUT ANY FAÇADE WITH FLOOR TO CEILING GLAZING.

LET IN THE LIGHT

No matter which Easy Glass[®] Juliet balcony you choose, it will make a stylish addition to your building's façade. All variants have a fully transparent glass structure. That ensures uninterrupted views and a wonderful feeling of light and air.

An Easy Glass Juliet balcony is just your thing when there is no space for a full balcony. You can use the systems to improve the external appearance of many building types, including apartment blocks and private residences.

A WEALTH OF OPTIONS

O-RAILING'S EASY GLASS RANGE INCLUDES A NUMBER OF JULIET BALCONY VARIANTS.

If you would like to create a minimalist feel, any Easy Glass® MOD 0742-0749 or Easy Glass® MOD 4747 point glass adapter is an excellent option. These stainless steel components bring a chic effect in combination with glass panelling.

For something a little different, consider an Easy Glass[®] MOD 6507-6508 Juliet balcony. This system, spanning up to 2.5 metres, holds its glass panels in place with stylish round or square cap rails. Matching wall flanges complete the effect. Attaching the balcony to a building's façade could not be easier, with a choice of horizontal or vertical fixings, giving maximum flexibility.

For additional visual impact, add linear LED lighting to the underside of the specially designed rectangular aluminium cap rail of the MOD 6507-6508 Juliet balcony. The LED strips are not only dimmable, they also let you set up just the right atmosphere by selecting the colour and warmth of the lighting.

All Q-railing's Juliet balcony systems have been thoroughly tested and conform to the latest international safety standards.

EASY GLASS JULIET BALCONY SPECS

- No visible screws to distract the eye
- Flexible in height and width
- Juliet balconies with cap rails or glass adapters
- LED lighting options for square MOD 6507-6508 cap rails (with Q-lights Linear Light)

Designed for:	Light and medium use
Use:	Outdoor
Variants:	Wall mount
Applications:	Juliet balconies
Material:	304 or 316-grade stainless steel or
	aluminium with stainless steel effect \ensuremath{IX}
Infills:	Glass
Glass thickness:	8 to 21.52 mm
Top finish:	Cap rails, U-profiles and Edge
	Protection in a variety of shapes,
	materials and sizes

BALUSTER RAILING SYSTEMS

DUOLINE AN INDUSTRIAL EYE-CATCHER

BOLD, IMPRESSIVE LINES WITH ANTHRACITE GREY POWDER COATING AND DELICATE HINTS OF HIGH-GRADE STAINLESS STEEL – A GREAT COMBINATION.

THE ESSENCE OF INDUSTRIAL

The Duo Line system lets you compose striking, visually appealing railing installations. It represents the best in today's industrial design with baluster posts made of lightweight aluminium, powder-coated in a highly scratch-resistant, anthracite grey paint.

When your project calls for a symmetrical look with sharp edges and visible workings, Duo Line delivers. The system is designed for both indoor and outdoor use, in locations ranging from office buildings to apartment complexes, and for applications ranging from balconies to barriers.

CLAMP IT

DUO LINE IS AN AVANT-GARDE BALUSTER RAILING SYSTEM THAT DELIVERS SMASHING GOOD LOOKS AS WELL AS AFFORDABILITY.

Budget-conscious builders appreciate the way Duo Line's aluminium posts and high-grade zamak connectors keep their costs down. Designers love the way its anthracite grey (RAL 7016) powdercoated posts work alongside stainless steel.

Combine the Duo Line baluster railing with vertical bars or use glass infill with stainless steel glass clamps, glass spider adapters or Glass Frame Tube. If you are looking to achieve a highly distinctive effect, go for the powder-coated version of Q-railing's square-shaped MOD 42 glass clamp. Its colour is an ideal match with the powder coating of the Duo Line posts.

Assembly is quick and easy, thanks to Duo Line's modular clamping system. Likewise, infill installation is a simple two-step process: push the special Duo Line adapters into the baluster posts and then insert the infill holders on the adapters. No drilling or tapping is required.

DUO LINE SPECS

- Highly scratch-resistant and extremely easy to maintain
- A unique modular clamping system for easy installation of infills
- Rapid assembly without the need for drilling or tapping
- LED lighting options available for handrails (with both Q-lights Spotlight and Linear Light) and cap rails (with Q-lights Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top, in-floor and fascia mount
Applications:	Stairs and balustrades
Material:	Aluminium and zamak
Infills:	Vertical bars, web and glass with glass
	clamps, spider glass adapters or Glass
	Frame Tube
Glass thickness:	8 to 12.76 mm
Top finish:	Handrails in a variety of shapes,
	materials and sizes

LINEAR LINE IS ALL ABOUT CLEAN LINES, SIMPLE SHAPES AND FLAWLESS SURFACES. PURE FORMS THAT SPEAK FOR THEMSELVES.

REFINED SIMPLICITY

The Linear Line baluster railing system is the very definition of simplicity and refinement. Here our designers have pared everything down to a pure concept: straightforward rectangular forms and impeccable surfaces. The system's infills match the other components meticulously.

48

Linear Line is a great system for any light or medium use application. Consider it to create a balustrade with simple outlines and a presence that isn't overpowering. A Linear Line post railing would suit both private and commercial settings.

A CONSISTENT LOOK

GEOMETRY IS KEY IN THE RANGE OF THE LINEAR LINE BALUSTER RAILING SYSTEM. THAT SIMPLE AESTHETIC IS APPLIED BOLDLY AND CONSISTENTLY.

In the Linear Line range you will find everything you need to plan a complete railing system. All of the components, from the characteristic baluster posts to the tiny, smart looking infill adapters, share the same pared down beauty. Everything is made from the finest 316-grade stainless steel.

Linear Line is an ingeniously engineered system. Its infills are incredibly easy to install. The stainless steel fittings are clamped onto the special adapters and then the adapters are simply pushed on to the post itself. For the infill you can choose vertical bars or use glass with either glass clamps or glass holders. The design of the glass holders renders glass drilling unnecessary.

LINEAR LINE **SPECS**

- No visible screws
- Quick and easy to install push and clamp
- No drilling or welding required
- LED lighting options available for handrails
- (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top, in-floor and fascia mount
Applications:	Stairs and balustrades
Material:	316-grade stainless steel
Infills:	Vertical bars or glass with glass
	clamps or glass holders
Glass thickness:	8 to 13.52 mm
Top finish:	Handrails in a variety of shapes,
	materials and sizes

SQUARE LINE® Stylish geometric designs

ANGULAR CORNERS AND CRISP STRAIGHT LINES, SQUARE LINE[®] HAS BEEN DESIGNED TO MAKE A STRONG STATEMENT.

PROVEN DESIGN

With its satisfyingly geometric look, the Square Line baluster railing system is 100% modern. Its straightforward lines prove that great design doesn't have to be complicated. In fact, the purity and simplicity of its components will make a powerful impression in any setting.

100

Hui

52

ABSTRACK BUT

Architects worldwide are looking to create an industrial look in their designs. It is a stylistic movement that affects everything from office buildings to balconies. Square Line is an excellent solution for many locations.

CUTTING EDGE

SQUARE LINE IS A HIGH-QUALITY, MODULAR CONCEPT EMPLOYING SQUARE AND RECTANGULAR FORMS TO GREAT EFFECT.

You could combine Square Line with other geometric components from Q-railing for a unified effect. Or maybe you like the idea of bringing contrasting elements together by combining Square Line with round or oval-shaped parts from other Q-railing systems. You also have a choice of infills: bars, cables, web or glass to complete the desired effect.

The Square Line post system is available in two variants: Square Line® 40x40 and Square Line® 60x30.

The 60x30 variant is the more heavy-duty version, capable of bearing even heavier loads than the 40x40. It has the same clean and minimalistic look as its smaller relative, although with bigger and thicker baluster posts. The high-grade stainless steel components and fittings of both sizes connect easily and seamlessly.

SQUARE LINE SPECS

- No welding required during installation, only gluing, drilling and tapping
- Square Line 60x30 comes with 60 x 30 mm posts and 60 x 20 mm handrail
- Combinable with components from other Q-railing systems
- LED lighting options available for handrails (with both Q-lights Spotlight and Linear Light) and cap rails (with Q-lights Linear Light)

Q-LINE THE TIMELESS CLASSIC

54

WHEN YOUR DESIGN CALLS FOR A RAILING SYSTEM BASED ON ROUND SHAPES, CHOOSE Q-LINE – A SYSTEM WITH UNLIMITED POSSIBILITIES.

ALWAYS IN FASHION

It is the timeless, rather modest design that makes Q-line a classic. With its clean and straightforward shapes in rich satin or polished stainless steel, it will still be looking contemporary years from now. Its appearance will never go out of fashion.

There is no system more complete, versatile and modular than Q-line. You can combine numerous different components and select satined or a polished stainless steel finish. As a result, Q-line will be at home in just about any environment.

MAXIMUM CHOICE

THE Q-LINE BALUSTER RAILING SYSTEM LENDS ITSELF TO EVEN THE MOST CHALLENGING DESIGN OR CONSTRUCTION SCENARIO.

The Q-line range includes a wide array of highquality pre-fabricated components and infills. You can use the system to construct everything from a transparent railing to an industrial-look architectural feature. The choice of infill is key: glass, bars, web and two types of cable. When using bar infill, you can even choose whether to arrange it horizontally, vertically or diagonally.

The Glass Frame Tube infill is a horizontal 'tube and clamp' system for glass panels. It makes for a chic, flawless appearance. Uniquely, it allows you to place the glass panels outside the baluster posts rather than between them. That makes longer glass spans possible and has the effect of creating more space on balconies and stairs.

Q-LINE **SPECS**

- No welding required during installation, only gluing, drilling and tapping
- Choice of a satined or polished stainless steel finish
- Combinable with components from other Q-railing systems
- LED lighting options available for handrails (with both Q-lights Spotlight and Linear Light)

Designed for:	Light and medium use
Use:	Indoor and outdoor
Variants:	Top, in-floor and fascia mount
Applications:	Stairs and balustrades
Material:	304 or 316-grade stainless steel
Infills:	Bars, cables, Easy Q-web or glass with
	glass clamps, glass holders, spider glass
	adapters or Glass Frame Tube
Glass thickness:	6 to 17.52 mm
Top finish:	Handrails in a variety of shapes,
	materials and sizes

HANDRAIL SYSTEMS

Q-HANDRAIL MULTI-PURPOSE DESIGNER DETAIL

60

ALTHOUGH HANDRAILS ARE PRIMARILY FOR SAFETY, THEY CAN BE AN IMPORTANT PART OF A BUILDING'S AESTHETICS.

ACHIEVE YOUR VISION

A great-looking handrail can transform your space. The Q-handrail range gives you a choice of handrails in stainless steel and various types of wood, because different materials create different atmospheres. And of course, you will always find an appropriate bracket.

Q-handrail products might serve a safety function in private residences and commercial buildings of various kinds. You can also use them to build greatlooking, safe handrails on barriers and partitions in public areas such as airports, railway stations, parks and more.

100

GE FOTOGRA

ENDLESS POSSIBILITIES

THE Q-HANDRAIL RANGE OFFERS A HUGE AND DIVERSE SELECTION OF HANDRAILS AND HANDRAIL COMPONENTS.

Give your imagination free rein with the resources in the Q-handrail range. The design possibilities are never-ending.

The massive selection of brackets means you can find a solution to just about any construction challenge. Round brackets, square brackets, brackets for walls, brackets for posts, brackets for mounting directly onto glass – you name it, Q-handrail has it.

Perhaps the most distinctive product in the range is a bracket with blind attachments. This highend component has a fascinating fluidity with no screws visible.

Q-handrail also includes engineered fittings that are virtually seamless, and flexible fittings that can be quickly adjusted to any angle.

Square Line[®] 40x10 is a true highlight. Aesthetically, this handrail system has really been pared down to the minimum: it relies on straight lines and flat shapes. By choosing the right end pieces and connectors you can achieve stunning results.

Q-HANDRAIL **SPECS**

- No welding required during installation, only gluing, drilling and tapping
- Components designed to fit together perfectly
- Flexible fittings, a wide range of end caps and wall returns, solutions for common corners and more
- Various LED lighting options available (with both Q-lights Spotlight and Linear Light)

Use:	Indoor and outdoor

Q-LIGHTS STEP INTO THE LIGHT

BRING AN EXTRA DIMENSION TO A BALUSTRADE OR STAIRS BY ADDING LED LIGHTING.

PAINTING WITH LIGHT

Light is one of the most effective ways to touch people's emotions. It can totally change the way you feel about a place. Q-lights Spotlight and Q-lights Linear Light are two exceptional LED lighting product lines. They put an exciting palette of light effects at your disposal.

The Q-lights system not only brings atmosphere to your balustrade installation, it also improves safety. It is fully compatible with multiple baluster post railings, glass balustrades and handrails from Q-railing, making it a highly versatile system.

FUNCTIONAL AND ATMOSPHERIC

THE Q-LIGHTS RANGE LETS YOU ADD DURABLE AND LONG-LASTING LED LIGHTING TO BALUSTRADES, BOTH INDOORS AND OUTDOORS.

With Q-lights Spotlight you can add a sequence of attractively spaced lights to a balustrade. Q-lights Linear Light, by contrast, will give you a continuous stream of ambient light.

Q-lights Spotlight is for installation in round stainless steel handrails. The individual lights bathe the walkway with a clear light exactly where it is needed. All of the system's handrail brackets, handrail adapters and wall flanges are fitted with cable ducts. That means the cable will be completely hidden from view, whether it has to go through a wall or through a post.

Q-lights Linear Light, on the other hand, comes with linear LED strips that give a continuous stream of light. The effect is dramatic. You have a choice of warm white light, cold white light or RGB-coloured light. The LED strips can be integrated into cap rails mounted on glass, and cap rails serving as handrails.

The Linear Light system is extremely versatile. It can even be incorporated into the Easy Glass[®] Juliet balcony MOD 6507-6508, and includes a cladding for the Easy Glass[®] Pro top-mounted base shoe.

Q-LIGHTS SPOTLIGHT **SPECS**

- For round tubes Ø 42.4 or Ø 48.3 mm
- Cables are hidden thanks to specially designed handrail brackets, handrail adapters and wall flanges
- Pre-wired, dust-proof and fully moisture-resistant
- When lit, the LED spotlights never become hot to the touch

Use:	Indoor and outdoor
Variants:	12 V (indoor IP20, outdoor IP66)
	and 24 V (indoor and outdoor IP66)
Applications:	Stairs, balustrades and wall
	mounted railings

Q-LIGHTS LINEAR LIGHT **SPECS**

- Integrates linear LED lighting into cap rails, into cap rails serving as handrails, and in the Easy Glass Pro top mount base shoe
- Special adapter available that turns a standard cap rail into an illuminated, bracket-supported handrail
- Pre-wired no cables visible
- Transparent or frosted plastic covers that prevent dazzle available for the LED strips

Use:	Indoor and outdoor
Variants:	Warm white light (24 V, indoor IP20,
	outdoor IP66), cold white light
	(24 V, indoor IP20, outdoor IP66) or
	RGB-coloured light (24 V, indoor IP20)
Applications:	Stairs, balustrades, Juliet balconies
	and wall mounted railings
